

DNA Cloning Services

IT provides the following categories of DNA Cloning customer services:

- One step cloning of desired cDNA into common vectors (expression vectors utilizing CMV, RSV, SV40, mPGK, mUBb promoter/enhancer, etc.), or vectors supplied by customer.
- PCR based modifications, including addition of Tags (6xHis, HA, Flag, etc), cleavage sites (Xa, Thrombin, etc) of customer supplied cDNAs.
- Cloning of customer cDNA from different sources: human, mouse, yeast, E.coli, viruses, etc.
- Combinations of the above three.

Order Information

ITEM	Catalog Number	Price
One step cloning into expression vector	IT-C100	\$ 499
PCR based modification into cloning vector	IT-C101	\$ 499
Cloning of customer cDNA into cloning vector	IT-C102	\$ 799
Tagged modification into expression vector	IT-C103	\$ 799
Cloned cDNA into expression vector	IT-C104	\$ 999
Clone cDNA with tag into cloning vector	IT-C105	\$ 999
Cloned cDNA with tag into expression vector	IT-C106	\$ 1199
